# Vapor Intrusion: The Conference II

## Legal, Technical and Regulatory Perspectives

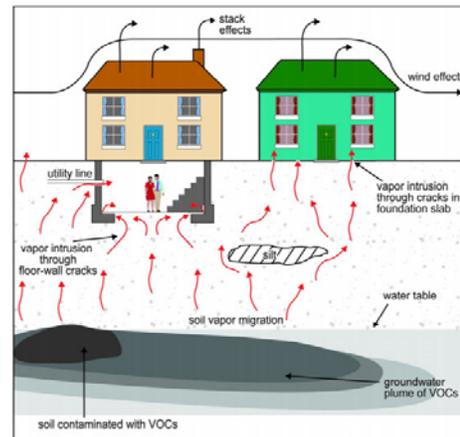

Program Organizer:  
*Association of Environmental & Engineering Geologists – Carolinas Chapter*

October 5 and 6, 2017  
Hilton University Place, Charlotte, NC

### Conference Overview

Vapor intrusion continues to be a major topic of discussion in the environmental industry. Since the first vapor intrusion (VI) conference organized by AEG Carolinas in 2014, the U.S. EPA and several states, including North Carolina, have published several technical guidance documents on vapor intrusion, and a revised toxicological profile for trichloroethylene (TCE), which has spurred a renewed interest in VI. With the large volume of regulatory guidance and updates, AEG Carolinas believes that now is a good time for another regional conference on VI to address the current state of the practice. The NCDEQ Division of Waste Management will again co-host our conference.

The conference program includes, as in 2014, speakers from a variety of backgrounds. Regulators, environmental consultants, scientists, researchers, and attorneys from across the country will present the latest technical, regulatory and legal perspectives on VI. The aim of our program is to provide broad coverage of the current state of scientific understanding, state and national regulatory frameworks, and the direction of evolving science and policy efforts to address vapor intrusion.

### Schedule

A full day of invited talks on Thursday with keynote speakers in the morning and afternoon, a TCE session in the afternoon, and tentative plans for an evening social. Friday's program will include a keynote speaker to start the morning, followed by invited talks, with an end to the conference at 2:00 pm. Breakfasts, lunches, and breaks will be included, as in 2014.

## Vapor Intrusion: The Conference II Legal, Technical and Regulatory Perspectives

Program Organizer:  
*Association of Environmental & Engineering Geologists – Carolinas Chapter*

October 5 and 6, 2017

Hilton University Place; Charlotte, North Carolina

### The confirmed speakers include:

- Dr. Blayne Hartman, Hartman Geosciences (*Keynote and presenter*)
- Henry Schuver, U.S. EPA (*Keynote*)
- Jim Fineis, Atlas Geo Sampling
- Christie Zawtocky, Hart & Hickman
- Helen Dawson and Bill Wertz, Geosyntec
- Delonda Alexander, NCDEQ

### Speakers at the TCE session:

- Ed Pfau, Hull & Associates
- Dr. Michael Dourson, Risk Science Center at the University of Cincinnati
- David Gillay, Barnes & Thornburg
- Laura Trozollo, TRC Companies

**More speakers will be introduced as they are confirmed. Registration will soon be available at [www.aegcarolinas.org](http://www.aegcarolinas.org). Check our website for updated speaker lists, profiles, and abstracts.**
